OBJECTIVE

Open to internships in Rio de Janeiro (on-site or hybrid) or remote, and to website projects.

PROJECTS

Distri Rio distirio.com.br

Website and catalog for a distributor of confectionery, beverages, energy drinks and supplements that serves businesses in Rio de Janeiro and the Baixada Fluminense region.

- 333 product pages and 19 brand pages generated from a single JSON file by a Node.js script.
- Catalog search and filters.
- Order list that turns into a WhatsApp message; before sending, the customer enters their CNPJ (Brazilian company registration number), name and WhatsApp number.
- Technical SEO: sitemap and structured data.
- Form whose messages are delivered by email.
- Analytics cookies only after consent (LGPD, Brazil's data protection law).
- On every push, GitHub Actions checks links, images and user flows in headless Chrome.
- Automatic deployment to GitHub Pages in 20 to 60 seconds.

TV Series Catalog study project · Alura

Catalog with JSON data, search by title, genre filter and details in a modal window.
